

Report on Thanks Giving Ceremony for Cadaver

“THE CADAVER AS OUR FIRST TEACHER”

Venue : Anatomy Dissection Hall

Date : 01.12.2021

Time : 11.15am

The Department of Anatomy conducted a program to honour & thank the cadaver - “The cadaver as our first Teacher” for I – MBBS students 2020-2021 batch. The faculty from the department of Anatomy and students of I–MBBS participated in the Program. The students were made into two groups to attend the program in view of COVID19 pandemic to maintain social distancing. The HOD, Department of Anatomy felicitated the gathering.

Students shared their views and their experiences of handling cadaver with their peers. The students missed hands on cadaver dissection during the lockdown period. They thanked the person who had donated the body for dissection purpose and wished to do the same. They mentioned that they could understand and learn anatomy better by touching various structures in the cadaver. They showed heartfelt gratitude towards the cadaver, teachers, and thanked the attendees who handle the cadaver. The program ended with one minute of silence for honouring the cadaver. Ansha. A & Athul Agnihothri. M.S on behalf of their batch mate express their gratitude towards the cadaver. Seiha Fathima wrote a poem about cadaver and express her gratitude towards the cadaver

Prof & Head
Dept of Anatomy

SEIHA FATHIMA

We all summoned here. As a tribute to you!
Oh the one who lays here still and still - - -
throughout our blooming days.

I still remember the first day I saw you.
I felt strange for a few mins
It was a weird feeling lying halfway between
fear and strangeness to see a lifeless body
I had goosebumps when I
first touched you, when I felt your muscles

I knew then why they said you were a
great teacher

you said no words of pain though you
were being skinned, pinned and tied.
you always stood steadfast like the
decision you made when you decided
to give yourself to the world of knowledge

you will be remembered even after you leave
your home. The knowledge gained from
you will live and save lives in future
The power you have being dead and still
being able to save lives is inexpressible

We don't know, who you are, from where
you are.

All we know is that the dissection lab is
your home and we address you as the cadaver

but we need to say this to you

Oh you stranger we are grateful to you
